

Process to Develop Implementation Plan

- Identify data needs and issues for your method
 - Existing data and reliability
 - What is the quality of existing data?
 - How well does the existing data cover the relevant geographic scale?
 - Missing or inadequate data
 - Feasibility of data collection

1

Process to Develop Implementation Plan (Cont.)

- Identify existing activities in support of your method or components of methods
 - Grower's irrigation management
 - Periodic AWMP preparation
 - DWR regional assessments
 - University/extension activities?

2

Process to Develop Implementation Plan (Cont.)

- Develop alternatives and schedule of implementation
 - Rapid implementation
 - Phased implementation
 - Schedule of implementation
- Include more detailed assessment of data *as a component of the implementation plan*
 - Who to implement?
